

## Success for Every Student

## Mission

We, the St. Francis Elementary School community, foster the love of learning while respecting the individualities and strengths of each child within a caring and engaging environment.

## Educational Project 2014 - 2018

1. For students to be competent speakers, readers, and writers in both English and French.
2. For students to master and apply math skills and concepts.
3. For students to be confident, responsible, autonomous, considerate, and involved members of their community, near and far.

## Vision

We instill in our students the ability to be competent, confident, independent, responsible, and bilingual members of society. We encourage our students to develop and express their creativity. We support our students to become motivated life-long learners and critical thinkers while developing to their full academic and personal potential.
